Summary

B.Tech graduate in Computer Science Information Technology and a fresher with hands-on experience through academic and personal projects in full-stack web development. Skilled in React.js, Node.js, Express.js, MongoDB, and REST APIs, with experience building responsive, user-focused web applications. Strong problem-solving skills and eager to learn new technologies and contribute to a development team.

Skills

Languages: C++, C, JavaScript, SQL

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS, Chakra UI

Backend Technologies: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, Firebase, Supabase

Core CS: DBMS, Operating Systems, Computer Networks, Object-Oriented Programming

Tools: Git, GitHub, VS Code, Render, Vercel

Projects

EncoreHub: Event Ticket Booking Platform | *React.js, Node.js, Express.js, MongoDB, JWT, Razorpay*

- Developed a full-stack event ticketing web app using React, Node.js, Express, and MongoDB, enabling users to browse events, select seats, and book tickets in real time.
- Implemented secure user authentication using JWT along with Google OAuth for quick and seamless login. Ensured protected routes and secure session handling across the application.
- Integrated Razorpay payment gateway and automated QR-code e-ticket generation for confirmed bookings.
- Built an admin dashboard for managing events and bookings, and deployed the responsive application live on Vercel.

ConnectSphere: Full-Stack Social Media Platform | *React, Node.js, Express.js, MongoDB, JWT, Cloudinary*

- Built a full-stack social networking platform using React, Node.js, Express, and MongoDB, featuring user profiles, connect/follow requests, and an infinite-scroll post feed with likes, comments, and reposts.
- Implemented secure JWT-based authentication with protected routes and secure password storage for user accounts.
- Designed a jobs board with filtering and one-click apply, and integrated Puppeteer to auto-generate PDF resumes from user profiles
- Deployed the fully responsive application with CI/CD pipelines on Vercel and Render.

ShareMyDrive: Carpooling Platform | *HTML, CSS, JavaScript, React.js, Chakra UI, Firebase, LocationIQ API*

- Built a role-based ride-sharing platform using Firebase Authentication with separate onboarding flows for Drivers and Riders.
- Integrated the LocationIQ API for location autocomplete and static route-map rendering between pickup and drop-off points.
- Developed user profile and rating system features, allowing drivers and passengers to rate each other post-ride to build a trustworthy community.
- Built dedicated Driver and Rider dashboards covering ride requests, booking history, and profile management, with Chakra UI and Framer Motion for a responsive, animated interface.

Education

Dronacharya College of Engineering

2022 – 2026

B.Tech in Computer Science & Information Technology, Percentage: 80.6%

Bright Career School

2019 – 2021

Senior Secondary (PCM), Percentage: 81.8%

Certifications

JavaScript Programming Essentials – IBM (Coursera)

Introduction to Back-End Development – Meta (Coursera)
